

EDUCATION

BROADBAND

We are focused on providing a safe learning environment where your students can be adventurous online.

Designed just for schools.

Netbuilder Education Broadband is a specialist internet service for the education market, delivering the best available connection to your school at a cost to suit you.

Our broadband has been designed with education in mind and refined in response to your requirements. Our solution meets the needs of UK schools, combining cutting edge technology with world leading filtering and security products.

Cutting Edge Technology

Meeting security and legislation requirements.

We provide managed and self managed options, choose from fully customisable, DfE compliant web filtering, unparalleled network protection and GDPR security features.

"Since moving to Netbuilder Education Broadband staff and children are more confident when using online resources. Lessons can be confidently delivered and the use of online services such as Office 365 & ScholarPack has resulted in a more flexible way of working, I can even work from home!"

Sue Bladen - School Business Manager - Pitmaston Primary School, Worcester.

EXPERIENCED AND QUALIFIED SUPPORT

Continuous support

From the moment you contact Netbuilder Education through to the installation and ongoing service support, our dedicated qualified team of experts will ensure the best possible customer experience.

Our team are highly trained in firewall fundamentals and best practice. In accordance to our ISO standards and processes, we manage change requests on your behalf and track and log all changes. Maintenance is performed out of hours to ensure minimise disruption. We actively monitor your connection and respond within minutes in the event of a failure.

Specialists

Partners

Our partners include Smoothwall, Watchguard, Visigo and Place Partnerships. We bridge the gap between these companies so you don't have to.

We are the only provider in the area that supports Place Partnerships Boiler and Energy Management Systems. There are no additional charges or requirements for this service. Additionally, if you take out a premium firewall, we handle the whole project from start to finish.
